Thursday 21 September 2017

Welcome and Introduction

Simona Boscani Leoni
(Universität Bern)

11.00-
12.30

Keynote Speech

Revisiting Local Knowledge and the Indigenous in Eighteenth-Century Natural History: A Few Thoughts

Alix Cooper (Stony Brook University)

12.30-
14.00

Lunch

This conference aims to analyse the exploration and "invention" of territories in a comparative perspective. Following the findings of historians emphasising the social and cultural practices of early modern natural history, the focus will be on collecting and exchanging, measuring and classifying information on territories of different scope. Thus, we are interested in discussing how various interests and means enabled the production of knowledge.

Mapping the Americas

Chair: Christian Büschges (Universität Bern)

Unstable Natural Knowledge Production: The Malaspina Expedition at the Edges of Spanish Colonial America (1789/1793)

Marcelo F. Figueroa (Universidad Nacional de Tucumán/CONICET)
